Gürpınar İMKB Vocational and Technical Anatolian High School

- IT | 2015 - 2019

PERSONAL PROFILE

I am a 2nd year computer engineering student at Düzce University. I'm second in the department and my average is 3.50. I want to achieve the same success in real life. I studied in vocational high school so I have a background. I am an easy learner and open to innovations. I have participated in two robot competitions before. Thanks to these experiences. I can adapt to teamwork. I am currently working at school. I am responsible for some of the edits on the school's website. I have a compulsory internship for the summer so I'm looking for an internship. I would love to gain new experiences, improve myself and show myself at the workplace where I do my internship.
